Surefyre

An amazing submission experience changes everything

Surefyre is a modern and flexible submission platform
that any P&C insurer can use to automate applications, rating, and quoting.
Unlock enterprise-level user experience, efficiency, and growth without the overhead.

Data Capture
Applications just got a whole lot easier

Build intuitive webforms with our drag-and-drop form designer. Use OCR to extract data from PDFs, no rekeying necessary. Let Surefyre fetch external info for properties, vehicles, and more. Automatically validate data. A great application experience means happy applicants, easier underwriting, and more business.

Rate & Quote
Complexity made simple

Calculate rates and generate quotes automatically. Provide real-time indications, straight through processing, or let automation assist your hands-on underwriting process. Powerful and flexible document generation reduces quote creation to a single click. Multi-state, multi-line, admitted, E&S, and everything in between.

Codeless Configuration
Workflow automation done your way

Unparalleled codeless configuration tools unlock enterprise automation that previously required an army of developers. Non-technical admins can create webforms, email automation, document templates, and more. No code necessary. Existing IT teams can work more efficiently and focus on supporting the business.

Easy Integrations
Your business, synchronized

Integrations are fast becoming a necessity for the modern insurer to stay competitive. Let Surefyre pull data from external sources, use web-based raters without rekeying any data, and have everything sent to your backend systems without a thought.

90% faster
quoting time

2.5 hrs saved
per submission

99% faster
form update time

> **Surefyre has consistently exceeded all expectations and has pushed our online presence to the next level.**
